

# 'BREW-MAGIC' BREWING SYSTEM<sup>(R)</sup> by SABCO

## DESCRIPTION:

Semi-Automated recirculating infusion mash brewing system (RIMS). Designed by master brewers and brew-scientists, for precise repeatable all-grain brewing specifically as a pilot or small batch primary brewery. User friendly controls, careful wort handling characteristics, microprocessor controlled mash temperatures, and all stainless commercial construction, make the Brew-Magic Brewing System the most desirable pico-brewhouse in use today. Hundreds are currently in use around the world both commercially and privately, by brew-professionals for recipe development, as well as by advanced home-brewers.

## 31 ADVANTAGES:

- 1) The amazing Vision 350<sup>(R)</sup> Color Touchscreen PLC by Unitronics along with a comprehensive package of onboard programming that allows brew-session recording, full control playback and 1/10th deg. accuracy.
- 2) Lab tested ZERO stratification of heat in the Mash kettle for amazing temp. control
- 3) No hot-side aeration or caramelizing effects ( tested by Dr. George Fix himself )
- 4) Built in electric heat exchanger ( very low wattage, with zero caramelization effects )
- 5) Centrifugal, magnetic drive pump with ultra smooth wort handling characteristics.
- 6) Safety ground fault circuitry ( 110 Volt, grounded )
- 7) Heavy duty, baked enamel frame, excellent for either home or rugged commercial applications
- 8) Built in rugged storage rack for brewer convenience
- 9) Heavy duty locking castors for easy roll away storage
- 10) Tiered gravity design for transfer from mash to boil and boil to fermenter
- 11) Ring style, cast, fully adjustable burner under each kettle ( propane or natural )
- 12) Accurate 3" dial thermometer on each kettle
- 13) All stainless steel aseptic keg-kettle construction with sanitary welding throughout.
- 14) Sabco exclusive Tri-Clamp siphons in Mash and Boil kettles. Easy removal for cleaning.
- 15) Brewer preferred Tri-Clamp connections at all kettles. Quick, reliable, sanitary and stainless !
- 16) Built in gas manifold with independent ring burner control valves
- 17) Full ½ barrel kettle capacity ( 15.5 gal ). Batch capacity up to 14 gal.
- 18) Completely independent manifold for wort re-circulation handling
- 19) Self cleaning feature during final sparge
- 20) Locking child safe electrical components cabinet
- 21) Appropriate LPG regulator ( propane model ) and pressure hosing included with unit.
- 22) Built in sparge and boil kettle sight glass tubes... all 'Tri-Clamp' removable for cleaning.
- 23) Automatic playback controller mode to re-create an exact clock-time recording of a previous brew session.
- 24) Removable, perforated, stainless false bottom for clean-ability and maximum mash re-circulation and filtration effects.
- 25) Direct input thermocouple for accurate, 'no lag', temperature controller communications
- 26) Variable free automated procedure with a stir-free static filter bed for exceptionally 'crystal-clear' runoffs
- 27) Plain English owners manual that makes an advanced system an easy one.
- 28) Customer service hotline to answer ALL your Brew Magic questions and an international users group forum online.
- 29) Workmanship and satisfaction warranties by Sabco to guarantee your success.
- 30) Brew-Magic has a 17 year history of success and continuous improvement. Over 1500 sold in over 18 countries.
- 31) It's made by Sabco... a company dedicated to brewers since 1961. Almost 50 years !
